FLORIAN SCHORER

DATA SCIENTIST

ABOUT

After five years of experience as a Management Controller/Business Analyst in the transportation sector, I took a two-year break to travel, including several months in Australia where I combined exploration with professional experience. Building on this dual experience, both professional and personal, I embarked on a career transition into Data Science and Machine Learning through OpenClassrooms' training program, with the goal of transforming data into concrete decision-making tools.

WORK EXPERIENCE

TRAVEL & WORKING HOLIDAY VISAS

04.2023 - 03.2025
